

Which training sources transfer to natural cgreGFP?

Same test sequences and same training budget in every column; filled dots identify training sources.

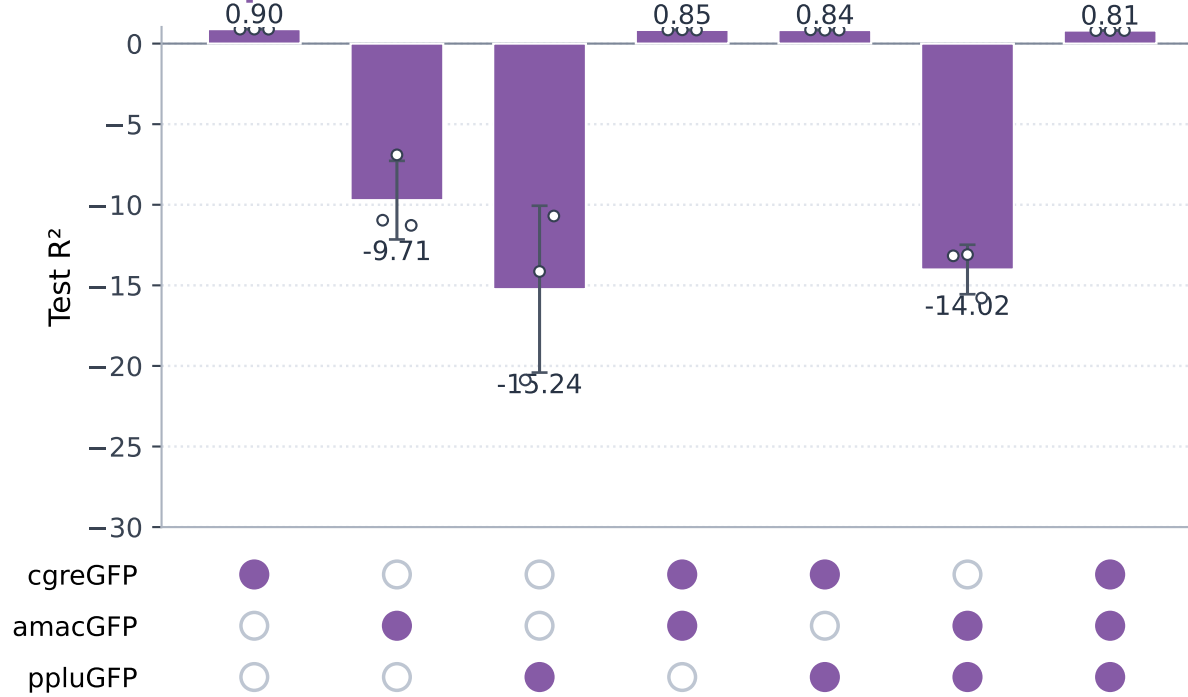

Aubin 1-10-1

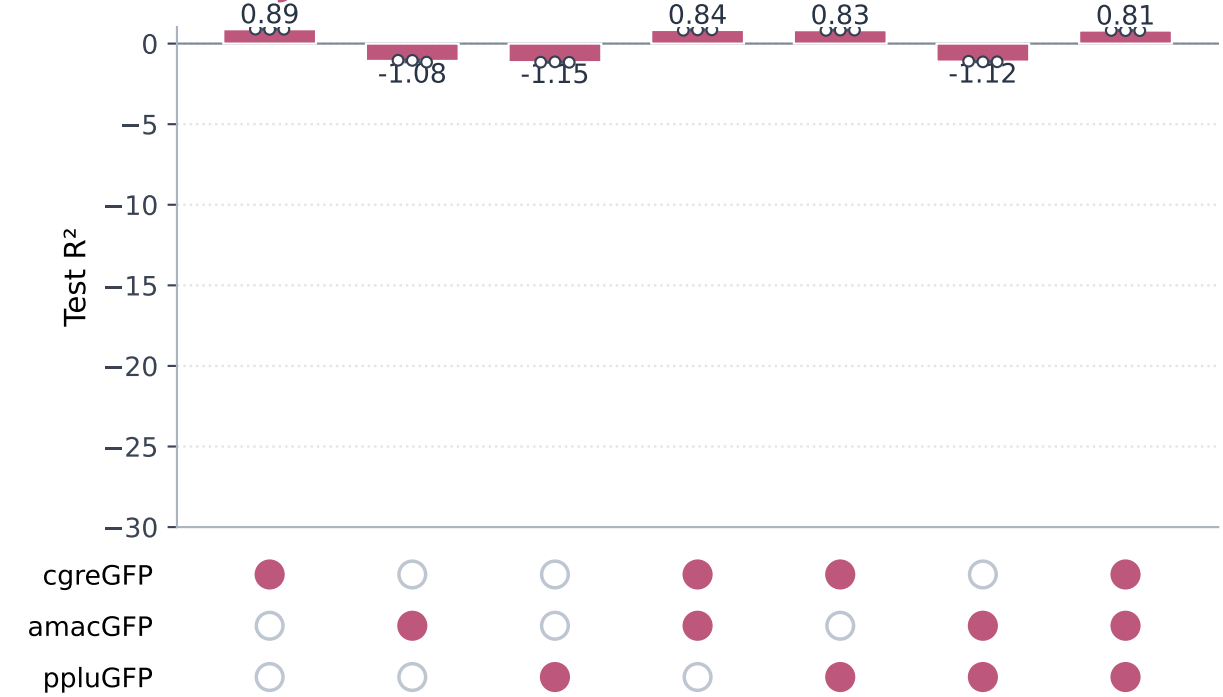

Small MLP

Deep MLP

CNN Jannis

Used per fit: 14,709 train / 4,903 validation / 4,904 test $\approx$ 60% / 20% / 20%.

Training-source ratios: single source 100%; pairs 50:50; triple 1:1:1. Validation has the same source ratios.

Bars: mean of 3 runs; small points: individual runs; error bars: run SD (not a confidence interval). Source-only checkpoint selection.
